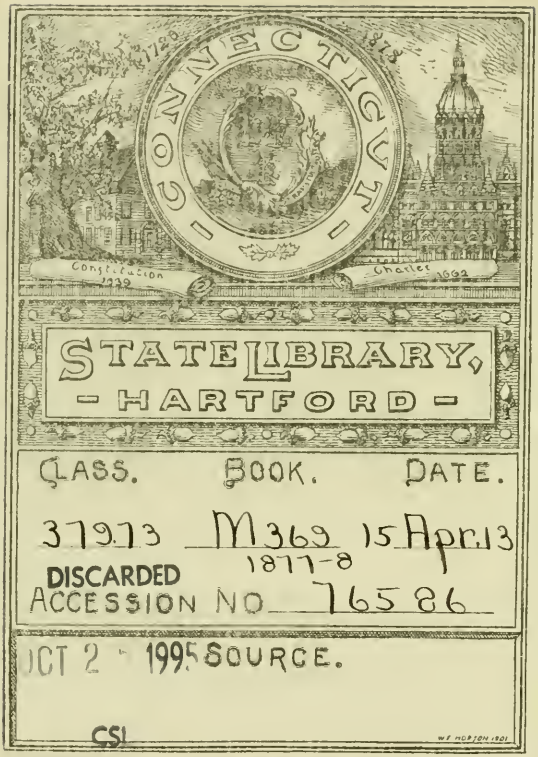
REPORT OF THE PUBLIC SCHOOLS OF MARYLAND 1878

APR 15 1913

APR 17 1913



REPORT

OF THE

State Board of Education,

SHEWING THE CONDITION OF THE

PUBLIC SCHOOLS

OF

MARYLAND,

FOR

THE YEAR ENDING SEPTEMBER 30, 1878.

ANNAPOLIS:
GEORGE COLTON, STATE PRINTER
1879.

STATE OF MARYLAND,

OFFICE OF THE STATE BOARD OF EDUCATION,

BALTIMORE, January 15, 1879.

To His Excellency, JOHN LEE CARROLL,

Governor of Maryland.

SIR: I have the honor to present to you the Annual Report of the State Board of Education, as required by law, for the school year ending July 31st and the fiscal year ending September 30th, 1878, with accompanying documents.

Very respectfully,

Your obedient servant,

M. A. NEWELL,

Secretary.

76586

Report of the State Board of Education.

Number of schools in Baltimore city.....	127	
" " in the counties.....	1862	
Total.....		1989
Being an increase in 1878 of..... 33		
Number of different pupils, city.....	45,951	
" " " counties.....	110,323	
Total.....		156,274
Being an increase in 1878 of.....5998		
Highest number enrolled in one term, city.....	35,288	
" " " " counties..	92,167	
Total.....		127,455
Being an increase in 1878 of.....7169		
Average number in daily attendance, city.....	29,518	
" " " " counties...	52,311	
Total.....		81,829
Being an increase in 1878 of.....6103		
Number of teachers, city.....	820	
" " counties.....	2251	
Total.....		3071
Being an increase in 1878 of 175		
Number of months schools were open, city....	10	
" " " " counties..	8 7-10	
Average for the State.....		9 1-10

Amount paid for teachers' salaries, city	$491,103 80	
" " " " counties ...	631,309 89	
Total.....		$1,122,413 69
Being an increase in 1878 of. $37,350 44		
Amount paid for building, repairing and furnishing school-houses, city.....	$102,073 79	
Amount paid for building, repairing and furnishing school-houses, counties.....	105,588 31	
Total.....		$207,662 10
Being a decrease in 1878 of....$801 53		
Amount paid for books and stationery, city....	$39,085 67	
" " " " counties .	55,867 34	
Total.....		$94,953 01
Being an increase in 1878 of. $15,350 99		
Amount paid for rent, fuel and incidenta's, city.	$45,712 76	
" " " " " counties.	42,990 13	
Total.....		$88,702 89
Being a decrease in 1878 of...$4,529 41		
Total expenditure for Pub. Sch. purposes, city.	$677 976 02	
" " " " " counties.	915,283 64	
Total.....		$1,593,259 66
Total expenditure for Pub. Sch. purposes, 1877.		1,544,515 54
Being an increase in 1878 of.....		$48,744 12

Of the total expenditure by the city ($677,976.02)—

The current expenses of white schools amounted to.....	$542,266 61
" " colored " "	57,715 11
The expenditure for building and repairs for white schools...	$55,682 33
" " " colored "	22,311 97

Comparing the County Schools of the present with those of the preceding year, we have—

Average number of schools reported in 1878....	1862	
" " " " 1877....	1827	
Increase in 1878.....		35

Total number of scholars enrolled in 1878.....	110,323	
" " " 1877.....	104,462	
Increase in 1878.....		5,861
Highest number enrolled in one term, 1878.....	92,167	
" " " 1877.....	86,340	
Increase in 1878—Total.....		5,827
Average number enrolled in 1878.....	82,260	
" " 1877.....	76,692	
Increase in 1878.....		5,568
Average number scholars in daily att'dance 1878,	52,311	
" " " " 1877,	47,804	
Increase in 1878.....		4,507

	1878.	1877.
Number of teachers (including Ass'ts) men.....	1,207	1,130
" " " " women...	1,044	1,012
Total	2,251	2,142
Increase in 1878.....	109	

Average number of months schools were open, 1878.....	8 months, 14 days.	
Average number of months schools were open, 1877.....	8 " 18 "	
Decrease in 1878.....		4 days.
Amount received from State as School Tax, Free School Fund and Academic Fund, 1878.....	$361,738 56	
Amount received from State as School Tax, Free School Fund and Academic Fund, 1877.....	327,636 97	
Increase in 1878.....		$34,101 59
Amount received from appropriation to colored schools, 1878.....	$79,441 55	
Amount received from appropriation to colored schools, 1877.....	79,488 37	
Decrease in 1878.....		$46 82
Amount received from County taxation, 1878...	$385,651 56	
" " " 1877...	393,637 17	
Decrease in 1878.....		$7,985 61

Amount paid for teachers' salaries, 1878.....	$631,309 89	
" " " 1877.....	609,734 15	
Increase in 1878.....		$21,575 74
Amount paid for building, repairing and furnishing school houses, 1878.....	$105,588 31	
Amount paid for building, repairing and furnishing school-houses, 1877.....	106,451 64	
Decrease in 1878.....		$863 33
Amount paid for books and stationery, 1878.....	$55,867 34	
" " " 1877.....	49,307 63	
Increase in 1878.....		$6,559 71
Amount paid for supervision and office expenses, 1878.....	$40 582 78	
Amount paid for supervision and office expenses, 1877.....	41,067 13	
Decrease in 1878.....		$484 35
Amount paid for incidental expenses, 1878	$42,990 13	
" " " 1877.....	47,231 11	
Decrease in 1878.....		$4,240 98
Amount paid for interest, 1878.....	$4,115 02	
" " 1877.....	5,185 67	
Decrease in 1878.....		$1,070 65
Amount paid for miscellaneous expenses, 1878...	$6,404 40	
" " " " 1877...	5,359 21	
Increase in 1878.....		$1,045 19
Amount paid for colored schools, 1878.....	$79,441 55	
" " " " 1877.....	87,111 68	
Decrease in 1878.....		$7,670 13
Amount of indebtedness paid in 1878.....	$28,425 77	
" " " 1877.....	63,888 50	
Decrease in 1878.....		$35,462 73
Total expenditure for Public School purposes, 1878.....	$915,283 64	
Total expenditure for Public School purposes, 1877.....	928,225 04	
Decrease in 1878.....		$12,941 40

The items of expenditure which show an increase are:

Salaries	$21,575 74	
Books and Stationery,	6,559 71	
Miscellaneous	1,045 19	
Total increase		$29,180 64

The items of expenditure which show a decrease are:

Building, repairing and furnishing	$863 33	
Interest	1,070 65	
Supervision and office expenses	484 35	
Indebtedness paid	35,462 73	
Incidental expenses	4,240 98	
Total decrease		42,122 04
Showing a net decrease in 1878, of		$12,941 40

Table "A" shows the population of Maryland by counties; the number of white and colored, and the number between 5 and 20 years of age.

Table "B" shows the quarterly distribution of the State School Tax to the several counties and the city of Baltimore.

Table "C" shows the amounts received by the several counties as "State School Tax," "Free School Fund," "Academic Fund," "Appropriation to Colored Schools," and "County Tax."

Table "D" shows receipts from all sources, with the totals (including balances carried over).

Table "E" shows the expenditures of the several counties under the items, Teachers' Salaries, Incidental Expenses, Books and Stationery, Repairs and Furniture, Supervision and Office Expenses, Miscellaneous, Interest, Indebtedness Paid; with the balances on hand and the totals.

Table "F" shows the average number of scholars studying the different branches in the several counties.

Table "G" shows the number of schools in each county; the number of months schools were open; the number of teachers, male and female; the number of different pupils; the average number of pupils enrolled and in attendance, and the highest number enrolled in one term.

Table "H" shows the number of months the white schools were open; the total cost; the average cost of each pupil per month and per year; the amount paid for teachers' salaries, and the average amount paid each teacher per month and per year.

Table "I" shows the number of colored schools in each county; the number of teachers; with the total enrollment and average attendance of pupils.

Table "K" shows the number of months the colored schools were open; the total cost; the average cost of each pupil per month and per year; the amount paid for teachers' salaries, and the average amount paid each teacher per month and per year.

Table "L" shows the amount received from the State for colored schools," and disbursement of the same.

Table "M" gives the statistics of the several colleges receiving State donations, and of the State Normal School.

Table "N" gives the statistics of the several schools and academies receiving State donations.

Table "O" gives a list of the County Examiners; their salaries, and the number of official visits paid to the schools.

SECRETARY'S REPORT.

REPORT OF THE SECRETARY

OF THE

STATE BOARD OF EDUCATION.

The Public Schools of Maryland have held their ground during the past year. They have done more: they have moved forward. Not uniformly, in one unbroken line, but with occasional breaks and curves; yet still, obedient to the word of command, moving "Forward!" The call for retreat (retrenchment), has been nowhere loudly heard, but it has had its effect nevertheless. The expenditures are slightly below those of last year. The call for new recruits was answered with alacrity, the school rolls showing 5,998 names more than last year. The most encouraging symptom is the fact that the average attendance has increased in greater proportion than the enrollment.

It is worthy of notice that the increase of average attendance is greatest where the teachers' salaries are, in part, contingent on the attendance of the pupils. It has been said that such an arrangement has a tendency to produce a show of attendance on the registers where there is no actual attendance at the desks. The *tendency* may be granted; but the vigilant supervision to which our schools may be and ought to be subjected will prevent this tendency from developing its bad effects.

Whether we consider the waste of educational energy caused by unnecessary absence, or the moral effect produced by habitual irregularity, the enforcement of punctual and regular attendance is of vital importance to the community, and should be regarded by the teacher as one of his most important duties. It would be very unreasonable to hold a teacher morally responsible for irregular attendance, which may be and often is produced by "circumstances over which

he has no control;" yet, when we see that the best schools have invariably the best attendance, there is some practical justice in the arrangement which gives the largest salary to the teacher of the largest school. Much benefit has been found from the use of postal cards, with printed headings, sent weekly or semi-monthly by the teacher to the County Examiner, giving a record of the attendance. The slight additional expense is more than repaid by the important information thus promptly given, which often shows the Examiner where a visit from him is most needed.

The subject of school attendance is one of the most important questions that come before the school authorities.

NEGLECTED CHILDREN.

A school census was taken by the police officers of Baltimore, in the year 1876, with the following result:

The whole number of children between 6 and 18 years of age was 69,303. Of this number, 44.5 per cent. were in public schools, 21 per cent. in private schools, and 34.5 per cent. not attending either; 23,736 children of average school age were thus not attending any school.

This is an alarming state of society; and all the more alarming because, though the facts have been laid officially before the public by the Board of School Commissioners in two successive annual reports, the publication has given rise to no action, and has apparently attracted no attention. That in a city of 300,000 inhabitants there should be a large number growing up in ignorance of the rudiments of school learning, would not be of itself a dangerous symptom. It is when we consider what at the present day are the necessary accompaniments of such ignorance, that the full extent of the evil becomes manifest. We can readily enough admit that mere intellectual development does not ensure good morals; that one may spell rightly and act wrongly; that accuracy in the multiplication table will not make a man honest, and that the ability to write may be perverted to improper uses. There have been, and there may still be, times and places where dense intellectual ignorance

is not incompatible with decency, morality and religion. But our lot has not fallen in these times, nor our lines in these "pleasant places." Whatever may be the case elsewhere, and whatever may be theoretically possible for us in the future, we know that, in the year of grace 1879, and in the city of Baltimore, to grow up without schooling is almost to grow up "without God, and without hope in the world." There are but three places of learning for city children: the family, the school, and the street. Leaving out of account the very small number whose education is well attended to within the limits of the family, every God-fearing parent, above the grade of pauperism, sends his children to school. Every parent, with the same exception, who wishes his children to "get on" in the world, sends them to school. When we know, then, that there are children in the city not attending any school, and when we reflect that in all probability the privation will be permanent with a majority of them, we know that we are keeping up a nursery of the "dangerous classes" in the midst of us. School learning does not necessarily produce good moral habits; but when boys and girls grow into men and women without having learned habits of obedience, order, regularity and industry, either in the school or in the family (and we have seen that, where the parents neglect the lesser duty of sending children to school, they will not, as a class, perform the greater duty of bringing them up properly at home), they go into the world with every predisposition to evil, and they perpetuate their kind. Simple ignorance, if such a thing were possible, would not be very hard to contend against. But ignorance, with its necessary accompaniments—necessary at least to us at the present day—lack of good family government, positive misgovernment, lack of good examples, positively bad examples, irreverence, lawlessness, idleness, spiritual and material wretchedness: ignorance such as this is the germ of a moral plague.

The given facts are simply these: a very large number of children are growing up without any good school or family training; before they go into the world, some of them will be reclaimed by the social and religious influences around them,

but many will go to swell the already large army of loafers, tramps, paupers and petty thieves.

The problem is: What can society do to lessen the number of irreclaimables?

A "compulsory law" has been proposed; it has been tried elsewhere; it has signally failed; it would fail if it were tried here as the only measure of reform, though it might be a useful auxiliary. Heroic treatment cannot cure a chronic disease. I can only briefly indicate the general character of the remedy which I would propose for the existing evil; details would be out of place.

Let it be remembered that the main object is not to teach children to read, write and cipher; but to bring children who are neglected at home, either through the poverty, the carelessness, or the bad habits of their parents, under a system of training which shall, as far as possible, make up for the lack of good home training.

Let it also be borne in mind, that no reform is possible without spending money. If it is objected that our school system already costs too much, I would say: "Then let the additional expense be charged to the police and the almshouse." These are the departments that would save money by reform.

Again, it must not be expected that any such sweeping reformation as is necessary can be carried out by the present school authorities. They are doing good work of another kind: they are superintending the education of the children of the respectable classes; their hands are full, and their experience in one branch of the business will not assist in the new field, but would rather be a hindrance. New wine must not be put in old bottles.

The "neglected children" have no desire for education, but they have a strong desire to make money. If they could see, or if their parents could see, that "there was money in it," there would be no trouble in getting them into school. A ragged newsboy will shiver in the cold and wet for three hours for the chances of making ten cents. Here is the magnet by which children may be drawn into school. Give them

a chance of making fifty cents a week each, and there will be five thousand children in school who were never there before, and who, but for some inducement of the kind, would never be in school.

The average annual cost *per capita* of the pupils now attending the public schools of Baltimore may be stated in round numbers as about fifteen dollars. It will be more if the average attendance, and less if the total number of different pupils, is taken as the divisor. I am firmly persuaded that the judicious expenditure of fifteen dollars a year *per capita* would bring under humanizing and civilizing influences a large majority of our neglected children.

The first question is: Is it worth the money? The philanthropist answers, yes; but the question is addressed, not to our sentiments, but to our pockets. The detection and punishment of crime and the support of pauperism cost the city of Baltimore, directly, nearly a million of dollars a year, and indirectly several millions. Would not the expenditure of a small sum for the purpose of bringing up neglected children in good habits be compensated by the saving of at least an equal amount in other directions? It is on this ground alone that, in these days of high taxation, I would plead for the experiment to be made.

The "experiment" may be described briefly as the establishment of a class of schools as carefully adapted to the neglected classes as the existing schools are to the respectable classes of society. The success of the experiment, if it should be made, will depend upon the completeness of the adaptation of the schools to the habits, the wants, the desires, the feelings, and even the prejudices of those whom we are seeking to benefit. And just because these differ so widely in the two classes of the community, there must be a wide difference between the schools intended for each. The hours, the studies, the methods, the rewards and the punishment must be different. When the conditions of the problem vary, there must be a corresponding variation in the solution.

In our present schools the problem is: Given the children of honest and industrious parents, some poor and others comparatively wealthy, but all "respectable;" all endeavoring, some with more and others with less success, to train their children in the fear of God and obedience to the law: how shall we best assist these parents in bringing up their children so that they may become intelligent and virtuous members of society?

The other problem is: Given the children of parents who are poor and shiftless, whom hard necessity compels to live from hand to mouth, who seldom enter a church door, who are saved from the almshouse every winter by out-door relief, who eke out the family income at the best of times by the earnings of their children on the streets, carrying baskets, blacking boots and selling newspapers: how can these children be converted into useful, industrious and orderly members of society? How can they be prevented from adding to the burdens of an already overburdened community?

In the one case the influence of the family is wholly on the side of the school. In the other case the influence of the family is wholly against the school of the orthodox pattern, or at the best is neutral. The conditions of the two problems being so widely different, we cannot expect that the method by which the one is solved will apply to the other. In fact, all we can positively know *a priori* is, that the regulation school must necessarily fail when applied to a class of pupils for whom it was not intended. Some of the principal features of the new school, as distinguished from the old, would be:

As to *hours:* Two hours a day instead of six, at first.

As to *attendance:* Irregularity no cause for loss of privileges, at first.

As to *dress:* Rags no objection; even dirt tolerated, at first.

As to *methods* of teaching: Oral and objective as far as possible.

As to *studies:* Hand work made prominent; memory work diminished; music and drawing in large doses.

As to other occupations: Calisthenic exercises; gymnastics and military drill; also some form of industrial occupation leading finally to the acquisition of a trade.

As to *rewards:* A pair of shoes to the shoeless when they are earned, and not sooner; no charity given, but payment made on a given scale for work done.

As to *punishments:* Loss of privileges the highest punishment.

As to *teachers:* They must be missionaries, not day-laborers; they must seek out the pupils, not wait to be sought out by them; they must be thoroughly versed in the improved methods of elementary instruction; the salary must not be high enough to induce any person to accept the position merely for the sake of salary; the majority of teachers should be selected, if possible, from among those who can live without teaching, but are willing to make their lives useful to others; there are many noble women among us who will volunteer in such a service if they can see clearly that their labors will not be in vain.

TEXT BOOKS.

There are various methods adopted in different counties for furnishing books to the pupils. In some counties the school board purchases books and stationery, and a quarterly fee (not exceeding one dollar) is collected from all pupils who are able to pay it. Indigent pupils obtain books without paying the fee, on the recommendation of the school trustees. In other counties the Board purchases the text books, and sells them to the pupils, either directly at the office of the School Board, or indirectly through the teacher, or through agents appointed for that purpose. In a few counties the Board merely announces the list of books authorized to be used, and leaves the parents to purchase them whenever they please. The objections to the renting of books are, first, the tendency to waste public property; and, secondly, the difficulty the teachers find in making collections. This last objection holds equally in the case of teachers who sell the books, and there is the additional objection that, in many instances, pupils

either will not or cannot procure books when they are needed, and thus the work of the school is greatly hindered.

It is difficult to secure a fair hearing for any suggestion that contradicts those traditional notions and practices which we have adopted without reflection, and continued without inquiry. There was a time when pupils carried with them not only their school books, but pens, ink, paper, and their share of fuel. The writer distinctly remembers receiving a pupil into his private school who brought his desk with him, and was astonished to find it a superfluous piece of furniture, for which no standing room could be found. Nowadays, desks, wall maps, blackboards, crayons, and generally pens and ink, are furnished by the school authorities without charge. Why not school books, also? The real reason is, that such has not been the custom. The ostensible reason is, that we cannot afford it. Yet, it would seem plain enough that the name free schools is a misnomer unless it includes a gratuitous supply of all that makes a school. Every free public school should be furnished at the public cost with all the appliances that are necessary for the proper management and conduct of the school: desks, seats, slates, pencils, pens, ink, copy-books, blackboards, crayons, wall-maps and text books; as well as fuel, brooms and water-buckets. For these accommodations children (who are able to pay it) may be charged one dollar, or less, a quarter, according to our present law; though it would be much better if the finances would permit us to make the schools absolutely free to all. The social distinction indicated by the terms "free pupils" and "pay pupils" ought not to be made prominent at so early an age.

The text books, like every other part of the equipment of the school, should be kept always in the school building, and in the immediate care of the teacher. This implies another and a more serious innovation on traditional observances. The schoolboy without his satchel! This strikes at the root of a superstition which has done more to retard the progress of elementary education than any other of the many false notions which still hold possession of the minds of an

unthinking public. I refer to the almost universally prevalent opinion that the home and the school must divide the work of education between them—that children come home to "study" lessons, and go to school to "recite" them. The practical effect of this creed is, that in many hundreds of schools there is no teaching whatever, teachers are so busy hearing lessons that they have no time to teach. The logical inference from the creed would be, that schools are a useless appendage to the education of the family. For, if the child knows his lessons, there is no need to go to school to recite them, and if he does not know them he cannot recite them if he goes to school, and his attendance is useless. Hence the frequent application to parents to allow their children to stay at home because they "do not know their lessons."

It is evident that, for the first two years, children cannot study at home; they have not information enough to make any study possible, except, perhaps the memorizing of the spelling of a few words, an exercise which, at that age, is not merely a waste of time, but a positive injury to mental growth. For the next three years children *ought* not to study at home. If their minds have been exercised vigorously for the six hours of the school day, they have done all the mental work of which they are capable without injury. If they have not been thus exercised, the school should be reformed. Thus, between the ages of six and eleven, home study is unprofitable, if not injurious

But granting that, at the age of eleven and upwards, children are capable of profitable home study, it must be remembered that comparatively few of the pupils attending our public schools, especially in rural districts, have the leisure and convenience which honest study demands. Many of them have domestic duties to perform—the girls inside the house, the boys outside. A still larger number have no place for study in winter except the family sitting-room, where they are exposed to continual interruptions and distractions. Even though time and place were not wanting to those who are studiously inclined, should the programme of the school be

arranged for the benefit of the few pupils of this class rather than for the many in the other class? There is another most important consideration: If it were possible for the teacher to force children between six and twelve years of age to spend a certain length of time every evening at home in preparation of school lessons, he ought not to do it, because the time could be spent more profitably in other ways. The family has duties and pleasures as well as the school, and cannot be ignored with impunity.

There are many things to be learned which the school does not and cannot teach. A child's time, after leaving school in the afternoon, should belong to himself and the family. The brain should be entirely relieved from compulsory work, and should have time to regain its elasticity before next day's labors begin. The natural products of the unnatural requirements of the school-room are ignorance and stupidity on the part of the many—unhealthy precocity on the part of the few. To what else can we attribute the fact that so many young people are utterly ignorant of everything outside of their text books, but to the preoccupation of their time with school work, so that they have neither taste nor leisure for general reading? The school should prepare a pupil to study, should beget a taste for study, should direct him in the choice of studies; but should not absorb all the time that might profitably be given to intellectual exercise: still less should it interfere with his physical development. To prevent misunderstanding, let it be added that, as a pupil becomes older, his power of home study increases, and may then be indulged to a limited extent without injury.

School books, then, for elementary pupils, belong to the school-room, and should be furnished at the public expense, like other school requisites. They should never be carried home. When a pupil is old enough to study more than six hours a day, his parents should provide him with the additional books needed for home study. In this grade there will be very few indigent pupils, and they can be supplied as at present. The wear and tear of books is owing principally to

their being carried to and from the school. By making this carriage unnecessary, the cost of books may be reduced to less than half of the present figures, thus making a saving of at least $30,000 a year in the counties, and probably $15,000 in the city of Baltimore.

But the gain would be greater in an educational than in a financial point of view. The paralyzing routine of lesson hearing would be broken into. School would become more of a workshop and less of a lounging-place. It would be recognized as the place where ignorance goes for instruction, not as a judgment hall where sentence is pronounced and punishment inflicted. There would be no more pleading for leave to stay at home because of unprepared lessons; and the teachers of Sleepy Hollow would awake to the conviction that the hearing of recitations, though an important part, is by no means the most important part of their duties.

All changes of text books ought to be made in the summer vacation, and not more frequently than once in three years, unless on account of breach of contract. A clause to this effect would be a valuable addition to our school law. An open book question is always annoying to a school board, and sometimes mischievous. Close and continuous observation during a period of twelve years convinces me that more trouble in the school administration has been created by injudicious and reckless book agents than by all other causes combined. The keeping of an indifferent school book in use for a year or two would be a cheap price to pay for protection against them.

SCHOOL HOUSES.

We have been spending about $100,000 a year in the building of new school houses, and this expenditure will in all probability be continued for some years to come. There was a provision in the law of 1865 that all school houses should be built according to plans and specifications issued by the State Board of Education. The present law requires the plans to be approved by the Board of County School Com-

missioners. This board is liable to change every two years, and few members remain in office long enough to obtain much practical knowledge of school architecture. Consequently mistakes are sometimes made which an expert would have avoided. If it were practicable to submit all new plans to a competent authority and to have the buildings supervised by an expert, money would be saved and the health and comfort of pupils greatly increased. The question of school architecture was considered by the Association of School Commissioners at their last meeting (as will be seen in another place), and it is hoped that their action may result in a great improvement in the style of building.

The natural anxiety of parents to have the public school sufficiently near their dwellings to enable their children to attend in all kinds of weather has a tendency to lead to an undue multiplication of school houses. In a few districts the evil is becoming apparent, and school commissioners should be on their guard to prevent its increase. With the limited means at our disposal, quantity can be obtained only at the expense of quality. Where schools are open (as in the majority of the counties) for ten months in the year, it is better to have one good school than two indifferent ones. And even where the schools run but three terms (seven and a half months), the terms might be arranged so that the schools should be open to the younger pupils during a part of the pleasant weather. An increase of schools beyond the minimum number absolutely necessary means increased building expenses, increase of incidental expenses, low salaries, mediocre teachers and short terms. These remarks will be confirmed by considering the case of Garrett county.

Garrett county has an actual school population of about 2,500; Allegany county about three times as many. The number of schools is the same in both counties. Garrett keeps schools open for *one* term in the year; Allegany for *three* terms. Garrett pays $75 a term to the teachers for one term in the year; Allegany pays $90 a term for three terms. It must be added in partial explanation that much of the

population of Allegany is concentrated in towns and villages, while Garrett occupies a wide area sparsely populated; and that the entire income applicable to public school purposes in Garrett county is not more than a fourth of what it is in Allegany. Still the question remains: Is it wise to try to keep seventy-five schools open on a net income of about $11,000 a year?

HIGH SCHOOLS, ACADEMIES AND COLLEGES.

Since the date of my last report I have visited the High Schools at Towsontown, Waverly, Woodberry and Reisterstown in Baltimore county; the High School at Hagerstown, the graded schools at Westminster and Frederick city, the graded school at Laurel, the County Normal School at Cumberland, the High Schools at Princess Anne, Salisbury, Snow Hill, Berlin, Pocomoke city, Easton, St. Michael's and Trappe (Talbot county); the Western Maryland College, the Agricultural College, and a considerable number of District Schools in various parts of the State. I have thus been able, from personal observation, to form an opinion respecting our general educational work, and to verify the results afterwards obtained by the study of written reports. It is gratifying to be able to state that the latter are abundantly confirmed by the former. The larger enrollment and better attendance recorded in the tables are but the outward and visible signs of internal improvement.

Teachers are doing better work, and their work is gradually becoming better appreciated. The links between the District School and the College are not yet complete: comparatively few of the counties on the Western Shore have county high schools (Allegany, Washington, Baltimore, Harford) and in some nominal High Schools no Latin is taught. It would be bad policy to push the High Schools where they are not wanted and would not be welcomed, for at the best a County High School exerts but a limited local influence; but a similar purpose is served by the infusion of a larger number of District School teachers who are qualified to teach the studies

preparatory to college when called upon. It is from this source rather than from the organization of a large number of high schools that we may look with confidence for a revival of learning. Enthusiastic teachers will always be able to find pupils willing to learn what they are able and willing to teach. This plan has the additional and important recommendation that it costs the public nothing beyond the maintenance of the ordinary district school.

The Agricultural College is in a prosperous condition financially and educationally. The attendance is not so large as it has been, but the organization is complete, the discipline is good, the facilities for learning quite equal to the demand, and the domestic department well managed. Agriculture is gradually assuming the rank to which it is entitled in such an Institution, and there is a prospect of establishing one or more workshops where the elements of mechanical industry may be learned in a practical way. The peculiar inducements to students preparing for admission to the Naval Academy have been withdrawn, and the military features are kept in strict subordination to the demands of physical exercise, the enforcement of proper discipline and the requirements of the Act of Congress establishing and endowing the College.

By an act passed by the General Assembly of Maryland the sum of $10,000, which, for the last four years, has been paid to St. John's College for the free boarding of fifty young men, who pledge themselves to teach within the State, has been equally divided between St. John's and the Western Maryland College, so that each will in future maintain twenty-six free scholarships under the conditions named. I have, in a former report, expressed my doubts of the propriety and the economy of such expenditures. Without repeating my objections to the principles involved, I ask attention to some of the details.

1. While the students who hold these scholarships bind themselves to teach, the colleges do not promise to prepare them for the business of teaching. Such education as is common to all undergraduates, whether their destination be the farm, the bar, the ministry, medicine or merchandise, they

get, and nothing more. The time has been when the knowledge of a subject was held to be equivalent to the ability to teach it; but that time has gone by, at least with thinking people.

The ordinary instruction of a college no more fits a man to be a teacher than it fits him to be a lawyer or a physician. Collegiate education in all three cases is necessary, but it is only the foundation on which the special education is to be built. Every college or university that undertakes to fit young men for the profession of law or medicine has a law school or medical school in addition to the ordinary literary and scientific schools. Does not the teacher need special preparation as well as the lawyer or the physician? And considering that fifty young men bind themselves to become teachers in return for benefits received from the State, should not the colleges which accept these obligations and derive advantage from them give these young men an opportunity of learning the principles and practice of their profession?

2. The law requires these beneficiaries to teach school for two years within the State. It does not require them (whatever may have been the intention) to teach in a *public* school. The legal obligation would be fulfilled by teaching a private school with half a dozen scholars. So far from this being an aid to public education, it might turn out to be a hindrance.

3. No provision is made for an accident which is not unlikely to happen. A young man or young woman may go through the college course without acquiring any aptness to teach. How is such a person to be relieved from the legal obligation?

The Visitors and Governors of WASHINGTON COLLEGE report the institution in a very satisfactory condition. Twelve students were graduated at the last Commencement. The nine county-scholarships provided for by the Act of 1856, and the six provided for by the Act of 1874, were filled by creditable students; five others received tuition free of charge. "The management of the institution is in all respects satisfactory to the Visitors; and the public usefulness of the College is believed to be generally appreciated."

JOHNS HOPKINS' UNIVERSITY.

Although this University is not officially connected with the State system of Education, yet the educational history of the year would be incomplete without a brief statement of its work. From the third annual report of the President we learn that the corps of teachers consists of six professors, fourteen associates, one resident lecturer, and fourteen non-resident lecturers. The students are classified as follows: sixteen fellows (who also act in part as instructors), thirty-five other graduates, twenty-five matriculates, and thirty-five special. Total 111.

The aims of the University are very frankly stated in the report, and the plans are developed as fully as the cautious and tentative policy of the trustees would permit. It is not their intention to add another "college" of the ordinary type to the hundreds already in existence. Even in Maryland there are already chartered colleges that give instruction in mathematical and classical studies, such as need not be duplicated in a University. But such colleges cannot deal effectively with those branches of science which require costly apparatus and large libraries. The trustees believe there was a strong demand for "opportunities to study beyond the ordinary courses of a college or scientific school." This demand they considered it their first duty to supply, and they think that the experience of the last two years confirms the wisdom of their decision, many graduates of other colleges having been attracted to the University by the eminence of the professors and the unequalled opportunities for advanced study.

As a second, but very important object, the trustees recognized the obligation implied, if not expressed, in the deed of trust, to make the University available to the young men of Maryland for systematic instruction in the higher branches of learning, without any preparatory training, except such as could be obtained at home in institutions already established. Accordingly, "courses of study leading to the Baccalaureate degree were marked out for such students." Graduates of

the City College were received, after due examination, as matriculate students; and arrangements were made for the reception of students from St. John's College at the close of their Sophomore year. The public will watch with great interest and some anxiety the development of this part of the University programme, not merely because they believe it will in time become the central dome of the great temple, but because as it advances towards completion it will mark a sympathetic advance of the whole public school system.

A third object has been to awaken and encourage a general interest in literary and scientific subjects by means of afternoon lectures, open to the educated citizens of Baltimore, under simple regulations. No part of the University work has been more highly appreciated than this. During last year nearly two hundred lectures of this series were delivered before audiences varying from forty-five to one hundred and ninety-five persons. I should make special acknowledgment of the benefits which the teachers and some of the more advanced students of the State Normal School have derived from attending these lectures. I am particularly grateful for the help given to those teachers who attended Professor Martin's Course of Lectures on Physiology with laboratory practice.

Among the other principal aims of the University must be mentioned the encouragement of original research in literature and science.

It unfortunately happens in our American colleges that genius is sometimes stifled or exhausted by incessant demands on the professors for labor as teachers. While the Johns Hopkins University recognizes the propriety of every professor being a doctor or *teacher*, par excellence, the Trustees have been careful to impose only so much of academic duty as might be a stimulus and a guide to deeper and higher investigations in their respective fields of labor.

The following schedule will give a more precise and comprehensive view of the daily routine of the University than any verbal description can convey. It will be understood that the programme is varied from time to time, so that the table only represents the work going on at the time it was made out.

STATE NORMAL SCHOOL.

The thirteenth annual session of the State Normal School closed on the 30th of May, 1878, with 217 students on the roll: 199 ladies and 18 gentlemen. Of these, 166 were present at the final examination at the close of the school; 33 were graduated, almost all of whom are now teaching; 16 undergraduates obtained employment as teachers, and 95 returned to school in September. The average number of new students being about 100 and the average number of graduates being about 30, it is worth inquiring what becomes of the remainder. The facts may be stated approximately thus: 30 per cent. graduate; 15 per cent. obtain certificates and teach without graduating; 20 per cent. are unable to pay their expenses longer than for a year; and 35 per cent. are unable to maintain their scholastic standing by reason of inadequate preparation or defective capacity. This last class are merely a drag upon the wheel. School Commissioners, who have the appointing power, should see to it that no students are sent to the Normal School to be educated as teachers at the expense of the State, except such as they know to be in good health, and to possess the requisite preparation and at least average intellectual abilities. The curriculum of the school is neither tedious nor difficult, but it is sufficient to sift the wheat from the chaff. While some graduates show more skill and acquire a higher reputation as teachers than others, it is matter of common notoriety that no person holding the diploma of the school has yet failed either in instruction or discipline. The school does not claim to be able to make good teachers of all students who are offered; but merely that its course of study and method of discipline are effective in selecting those who are most likely to succeed, and in enabling them to acquire that skill which comes only from practice, with a much smaller expenditure of time and labor than would otherwise be necessary.

It is to be regretted that so few young men avail themselves of the opportunity of attending the State Normal School. The

explanation of the fact is not difficult. Country schools pay too little to stimulate the ambition of a young man. City schools may be regarded as prizes, but the prizes are few in number, ninety per cent. of the public school teachers being ladies. Besides, while the Normal School was in contracted quarters, there was no proper accommodation for any large number of young men, and now that there is ample room for them, the Legislature offers a prize of eight hundred dollars each, in addition to free tuition, as an inducement to fifty-two young men, candidates for the profession of teaching, to go to *College* for their professional studies. Nevertheless it is claimed that during the six years that these inducements have been offered (ending June, 1878), the Normal graduates have furnished more male teachers to the public schools than the college graduates. It would require more complete statistics than I possess to verify the calculation.

The course of studies is so arranged that students who enter with sufficient preparation can graduate with ease in two years. It would be less difficult to set forth a course of study requiring four years. But when we consider that school teachers are not taken from the wealthy classes; that the majority of them are women; that they must be sixteen years of age before entering the Normal School, and that their salaries are not large, it would seem to be reasonable that the State should be satisfied, for the present, with such professional attainments as can be secured by steady application for two years. A post-graduate class, however, will be formed as soon as a sufficient number of students signify a desire for one.

The table on the next page will give some idea of the work of the school. The periods average about 40 minutes. There is a rest of ten minutes at half-past 10, and a recess of half an hour at half-past 12. Calisthenic exercises are performed at the close of some period every day. Studies not mentioned in the schedule (and required by law from teachers) are taken up at another session. The programme shows only the work for February. It is frequently changed.

INSTITUTES AND ASSOCIATIONS.

Fewer Institutes than usual have been held during the year. The loss has to some extent been made up by a revival of county and district teachers' associations, Baltimore and Cecil counties leading the way in this direction; but it is hoped that next year will witness a revival of the Institute. Our system has not yet risen to such a point that we can afford to ignore this, the most useful and the most available of all the temporary expedients that have been employed for the instruction and encouragement of young teachers.

The State Teachers' Association met in Baltimore in July: the attendance was good and the work was interesting and profitable. Some of the papers read deserve a permanent place in our educational literature.

The Association of Public School Commissioners held their annual meeting in the State Normal School on the 26th and 27th of November. The following resolutions were adopted:

"1. That a committee of seven be appointed to consider what changes, if any, should be made in the School Law of the State, and to report the result of their investigations at the next meeting of the association.

"2. That a committee of three be appointed to consider what steps can be taken to secure the payment of that portion of the Free School Fund which was withheld in 1877 on account of the Baltimore and Ohio Railroad Company failing to meet its engagements to the State.

"3. Considering that much money is annually expended in the building of school houses, and that much of this is expended by men who have had but little practical knowledge of school architecture; and that the results are that mistakes are sometimes made which might easily be avoided; that a committee of five be appointed to report to the next meeting of the Association the best plans for building—

"1. A one-room school house, brick and frame.

"2. A two-room school house, brick and frame.

"3. A three-room school house, brick and frame.

"4. A four-room house.

These plans, with specifications, on being approved by the Association, to be published at joint expense for the use of the several School Boards of the State."

LEGISLATION.

The late General Assembly had as usual a new school law under consideration, but failed to pass it. The principal feature was the abolition of the present method of appointing School Commissioners, namely, by the Judges of the Circuit Courts, and the substitution of the State Board of Education as the appointing power. This compelled the framers of the bill to devise another plan for constituting the State Board of Education. With these two prominent exceptions, and one or two unimportant additions and alterations, the bill was, word for word, a repetition of the present law,—a high compliment indeed to the existing system.

The most important enactment of the session, so far as education is concerned, was the "Act to define and prescribe the duties of the Comptroller of the Treasury relative to the apportionment and distribution of the public school tax, and to confirm the apportionments and distributions thereof heretofore made by that officer." This law settles the dispute between the Boards of School Commissioners and the Comptroller, by legalizing the acts of that officer and making what he states to have been his practice the precedent for the future. Some weeks before the law was passed the case was decided in favor of the School Commissioners by the Circuit Court of Anne Arundel county: but the action of the Legislature rendered the decision fruitless. By this step the white schools lose about one-fifth of their annual revenue from the State, but the loss will not be severely felt for a year to come.

An "Act for the better protection of insectivorous birds in Somerset county" (Chapter 44) gives one-half of the fines collected under it to the public schools of the county.

An Act (Chapter 64) relating to the catching of oysters and fish in Sinepuxent Bay gives half the fines collected under it to the public schools of Worcester county.

The eighth section of Chapter 70, "An Act to define and preserve the Inner Harbor of Cambridge and Cambridge Creek in Dorchester county," provides that "one-half of all the fines imposed and collected under the provisions of this act for the violation of the second offence specified in the sixth section of this act. shall be paid into the public school fund of said county." The ninth section of the same act specifies another offence, and assigns the whole of the fine to the public school fund.

A section of Chapter 108 for the protection of game, and other purposes, in Garrett county, assigns half the fines accruing under it to the county school fund.

Chapter 150, "An Act to prevent swine and geese from running at large in Creagerstown, Frederick county," gives all emoluments arising from fines to the trustees of the public schools.

Chapter 138 authorizes the regents of the University of Maryland to sell the buildings on Mulberry street, Baltimore, and to expend the proceeds "for any of the purposes of the University."

An act (Chapter 368) was passed requiring the School Commissioners of Anne Arundel County to expend three hundred and fifty dollars in building a school house for colored children in the fourth district of that county, and a similar sum for a school house in the first district, provided that certain parties named will donate an acre of ground to each as a building site.

An act (Chapter 269) was passed appropriating five thousand dollars to Charlotte Hall Academy, in St. Mary's County, to be paid in five equal instalments.

An act (Chapter 339) was passed to revive the corporation of the Vienna Academy in Dorchester County (which had expired) and appropriating three hundred dollars a year to the same.

The ninth Section of a local law for Dorchester County (Chapter 160) provides that "all moneys levied by the County Commissioners for educational purposes shall be levied separately and distinctly from the other items of taxation, and shall in no year be less than ten thousand dollars."

An act (Chapter 174) was passed "to consolidate and unite into one corporation the 'Washington University of Baltimore' and the 'College of Physicians and Surgeons of Baltimore city.'"

An act (Chapter 184) for the protection of terrapin in Anne Arundel County imposes a penalty for the violation of the law and assigns one-half of it to the School Fund of Anne Arundel County.

A similar act (Chapter 210) for the protection of partridges, &c. in Cecil and Harford Counties gives all the fines collected under it to the school fund of said counties.

An act (Chapter 242) for the protection of fish in Gunpowder, Middle and Back Rivers, gives half the penalties for violation of the same to the public schools of the county where the offence was committed.

A similar act (Chapter 276) for the protection of fish in the waters of the Chesapeake Bay adjoining Harford and Cecil Counties gives the fines and forfeitures accruing under it "to the County Commissioners for the use of the school fund," of the county in which the offence was committed.

A similar act (Chapter 280) to protect fish in the waters of Someret County "gives one half of the fines and forfeitures under it to the school board for the use of the public schools of said county.

An "Act for the benefit of St. John's College" (Chapter 315) provides for the reduction of the number of free boarding students from fifty to twenty six (one for each County and State Senatorial district), and for the payment of $200 a year to the College for each of said students, provided he "shall pledge himself, upon entering College, that he will continue a student thereof for the full term of four years, unless prevented by unavoidable necessity, and that he will teach school within the State for not less than two years immediately after leaving college, or so soon thereafter as may be practicable."

A similar act (Chapter 239) was passed "for the relief of Western Maryland College." This act gives the college twenty-six hundred dollars a year additional, "to be applied by them in furnishing board, fuel, lights, and washing to one

student to be educated free of charge for tuition from each Senatorial District in this State, and appointed by the School Commissioners in said Senatorial District, by and with the advice and consent of the Senator in their respective Senatorial Districts, after a competitive examination, provided," &c.

The property of persons dying intestate, and without a legal representative, is by law paid over to the School Commissioners. Chapter 316 enacts that "if any legal representative shall appear after payment has been made under the preceding section, the Board of County School Commissioners receiving such payment shall pay the same to such representative; but no collateral more remote than brothers' or sisters' children shall claim under this section.

An act (Chapter 325) "relating to the catching of oysters with scoops in Dorchester County," gives "all moneys arising from fines and forfeitures under this act, after the deduction of costs" to the public school fund of the county; "and all justices of the peace, before whom fines are imposed under this act, shall report the amount of the same to the treasurer of the School Commissioners within thirty days thereafter under penalty of fine of double the amount thereof."

The next chapter, "An act to protect the oysters in the waters of the Great and Little Choptank Rivers," gives half the fines and forfeitures arising under it "into the free schools' treasury of Dorchester County, for the use of said schools."

Chapter 345 enacts that the twelve hundred dollars of Academic donations now paid to Garrett County (as to all the counties in the State) "shall be applied to the support of the Grantsville and Oakland Schools in equal amounts," until a County High School shall be established.

Chapter 359 relates to the catching of oysters, and section 6 provides that the fines and forfeitures under it shall be used to provide police officers for the enforcement of the act; "and in case of a surplus" [a very unlikely case] "remaining over at the end of each fiscal year of the county, it shall be placed to the credit of the school fund of said county."

An act for the protection of wild fowl near Hooper's Island, Chapter 366, provides that "the money arising from said sales

and fines, after deducting the legal costs, shall be paid into the free school treasury of Dorchester County."

Chapter 367 revives the "Act to incorporate the Trustees of Buckingham Academy and Female Seminary of Berlin."

Chapter 373 "to prohibit the catching of oysters with scoops, drags or dredges," in certain waters of Somerset County, gives half the fines to the use of the public schools of the county.

Chapter 376 provides that oystermen in Somerset County shall pay ten dollars a year each for a license, and that "all moneys received under this act shall be paid over to and for the use of the public schools of the county."

Chapter 447 authorizes the trustees of Cavetown Union School-house to sell it.

Chapter 462 provides for a vote for or against liquor licenses in certain election districts of Dorchester County, and enacts (among other things) that the money received for licenses (if they are granted) shall be paid into the public school fund of the county. One-half of the fines also for the violation of this act goes to the public schools.

M. A. NEWELL,
Secretary.

		$621,000 00

REPORTS

OF THE

SCHOOL COMMISSIONERS

OF

THE COUNTIES.

ALLEGANY COUNTY.

DR. GEO. B. FUNDENBERG, *Prest.* J. W. S. COCHRANE, *Sec'y, &c.*

Professor M. A. Newell,

DEAR SIR: I herewith transmit the annual report of the Board of County School Commissioners of Allegany county for the year ending September 30, 1878. The tabular statement only shows the expenditures for two school terms, or payments made since January 1, 1878. The former treasurer has not made settlement with the Board, and I am, therefore, unable to give an itemized statement of his disbursements. From a statement made out at the bank, it appears that he received $20,695.07, and disbursed $20,665.34, leaving a balance of $29.73 now standing to his credit.

J. W. S. COCHRANE,
Secretary.

ANNE ARUNDEL COUNTY.

RICHARD H. GREEN, *President.* WILLIAM HARWOOD, *Secretary.*

Prof. M. A. Newell,

SIR: The annual report of the Board of County School Commissioners of Anne Arundel County is herewith submitted.

Our schools have been in operation throughout the regular terms for the past year. While laboring under considerable financial and consequent other difficulties, they are, we think, gradually improving. We are building several new school-houses, which we expect to be completed early in this year. In the inception of the school system much expense was incurred as for building school-houses, &c., which the revenue received was insufficient to discharge, and which continues to embarrass the management of the schools in our county. While unable to pay our teachers punctually, we are of course unable to supply many things most needful for the intellectual development of our children. We have no globes, no maps, no libraries, no variety of entertaining and instructive reading so essential to mental cultivation; nothing to awaken and gratify youthful curiosity, to cultivate the taste and stimulate the energies of the mind in the pursuit of knowledge. A little child came into the office, and looking round, repeated, "Second reader, second reader, second reader, I hates the very sight of 'em." The youthful mind requires variety and novelty of objects continually to engage and exercise its powers. It cannot be developed with a book on grammar, and a book on geography, and a book on arithmetic alone; any particular set of objects to which it is too long confined

will become wearisome and disgusting to it. A small library for each District School would not be very costly, but at present the School Board has not the means of purchasing it. It is necessary to convince those who can supply these wants of the importance of them to the improvement of our children, before we can make such progress as we desire, and as is practicable with the application of proper means.

The whole amount paid for books this year was $1,876.74, of which sum $616.25 was for books for the colored schools, and is charged to expenses of those schools. $516.46 was returned to us in the receipts from the sale of books, so that the actual expenditure otherwise was only $744.03.

Under the head of building school-houses are included a balance paid for a school-house built last year, a payment for a lot purchased to build on, and a payment for lumber for a house not yet finished.

We have started an account with the colored schools fund, crediting that fund with the several balances credited heretofore in the annual reports, amounting to the sum of $7,148.51, and charging that fund with $300 per annum for the services of the Examiner, and a proportion of other general expenses according to the number of their schools, making for the whole series of years, up to October 1st, 1878, the sum of $2,727.55, and, with the expenses of the last year, leaving a balance due these schools on the last day of September, 1878, of $2,760.38.

While there are many things in our schools which we desire to have altered, I was, in my progress through the county during the last year, much gratified with their general condition and the prospect of improvement in them.

WILLIAM HARWOOD,
Secretary, &c.

BALTIMORE COUNTY.

WILLIAM M. ISAAC, *President.* THOS. C. BRUFF, *Secretary.*

Professor M. A. Newell,

DEAR SIR: The Annual Report of the Public Schools of Baltimore County for the year ending September 30th, 1878, is respectfully submitted:

It has been a year of marked success in the history of the schools of this county. The present Board of County Commissioners are thorough school men who understand that money is necessary to work successfully any system of public education.

Imbued with this spirit, in their levy of 1878 they gave not only all that was asked for the support of the schools, but also promised to make provision for deficiencies created by former Boards. At the end of each month the schools are paid their prorata share of all money collected. This is an excellent system, and, if adopted sooner, would have saved the school treasury thousands of dollars. The benefits conferred on the schools by this act of justice cannot be over-estimated.

During the past year the Board has done more than it has heretofore, in building, repairing and furnishing school houses. From the summarized statement it will be seen that $17,393 have been expended in the erection of school houses. A brief description of the houses completed may not be out of place. School house 10, District 11, is built of stone, contract price $1,693. It will accommodate sixty pupils and is in a desirable location on the Dulaney's Valley Pike, six miles above Towsontown, and about three miles from any other school. The addition to school house 5, District 3, is a two-story brick structure, contract price $4,363. It is located in Woodberry

and replaces a frame building erected in 1862. A two-story brick addition with two rooms was built to this house in 1873, but, during the past five years the town has increased in population to such an extent that it became absolutely necessary to enlarge again. Owing to the smallness of the lot the old frame part had to be torn away, and was replaced with brick. There are now eight class rooms, besides a number of hat and cloak rooms in the building, and accommodations for about four hundred and fifty pupils. The addition was paid for in part by a note of three thousand dollars, given by the former Board of County Commissioners for that purpose from the contingent fund. The addition to school house 7, District 9, is also a two-story brick structure, contract price $2,792. The school house is located on Chesapeake Avenue, Towsontown. Prior to 1872 the only public school of which the county town could boast was held in an old frame building, into which between eighty and one hundred children were crowded. That year a more desirable lot was purchased and a handsome two-story brick house was erected upon it. In a few months after moving into this building the school increased from eighty pupils to over two hundred, and as there were only three class rooms it was deemed expedient to remove one grade to the old quarters. The separation of the school caused great inconvenience, and to provide against this, as well as for the increasing wants of the community, the addition was built. The house now contains five class rooms and one large assembling room, and will accommodate over three hundred pupils. School house 9, District 7, is built of brick, contract price $1,394. It is located near Bentley Springs, N. C. R. R. A public school was established at this point in 1868, and ever since has existed under great inconvenience in the basement of a warehouse, kindly granted free of rent by Charles W. Bentley, the owner of the property. This gentleman also donated a lot of ground containing one-half acre, which is the site of the present building. The addition to school house 2, District 9, is a frame weatherboarded building, containing two rooms, contract price $1,270. This school is located in Hampden

village. The old house, also frame, was built in 1863. For the past two years over one hundred and forty children have been crowded into space barely sufficient for eighty, and the patrons have repeatedly asked for better accommodations. In the present building there are three class rooms with seating capacity for one hundred and sixty pupils. The addition to school house 2, District 1, is built of brick, one-story in height and contains two rooms, contract price $2,745. It is located in Catonsville, a short distance from the turnpike. The old building is frame, containing three class rooms, originally built in 1859 and enlarged in 1872. The building was in need of repairs, the class rooms small and crowded to double their capacity, yet the patrons did not complain, and their patience has been rewarded by one of the handsomest two-room school houses in the State. The building will now accommodate over two hundred and fifty pupils. A number of houses have been put under contract and will be completed early in the ensuing year. Others have been petitioned for, and it is the intention of the Board to build at Canton, Spark's Station, Warren and Mt. Washington, as soon as practicable.

In constructing school houses the architecture has been greatly improved. They are no longer built of the roughest materials without symmetry or design, and stuck in some remote corner of the school district; but the most desirable and convenient sites are selected, upon which substantial houses, neat in design, ornamental in appearance, with all the modern improvements, are erected. Considerable attention has been given to ventilating, heating and lighting. The school rooms are so arranged that the pupils sit at their desks without having a glare of light blinding their eyes. The temperature can be reduced and impure air removed without opening windows and doors—a method of ventilation fruitful only of colds and doctors' bills.

Two thousand three hundred and thirty-four dollars have been expended for school house lots. Edwin Jessop and other heirs of Joshua Jessop, deceased, donated an undivided four-fifths interest of a lot in Dulaney's Valley, School 10, District 11. The other fifth belonged to minors, hence

it was necessary to have it condemned by a jury in order to secure a perfect title. This was done at a total cost of $79.30. There was paid to Nicholas W. Smith and wife $1,000 for two acres and twelve perches of ground at Mantua Mills; on this lot there is a substantial frame house, built by John F. Hey for a private school, which has been rented since 1872 for the use of School 8, District 4; half an acre of the lot has since been sold to Mantua Grange for $75. To William H. Hoffman $25 for one-fourth of an acre to enlarge School lot 7, District 6. To Mary J. Phillips $230 for three-fourths of an acre at the intersection of the Deer Park Road and the Liberty Turnpike; a contract is perfected for the erection of a stone house on this lot to take the place of the one now rented for School 9, District 2. To Charlotte Palmer $50 for one and a half acres near the old log building known as Ruhl's School House in the Sixth Election District; a handsome brick house will be erected here early in the spring, the building of which is under contract. To Charles W. Reinhardt $700 for a lot 104 feet deep by 76 feet front, situated in Mt. Winans, at the intersection of Arnold avenue and Bremen street. The drawings for a two-room house to be erected at this point have been completed. The house, when built, will accommodate the wants of the people in this rapidly growing community, and being centrally located, will be the means of consolidating the schools at Mt. Winans and Sextonville, a consummation much to be desired, as the house now occupied at the latter place is inconveniently situated and does not belong to the county. There was paid to Henry C. Luttgerding $150 for a half acre on the Liberty Turnpike, near Ward's Chapel. A stone house will be built on this lot, which will take the place of a house now rented for the use of School 10, District 2.

The total amount expended on the schools for the year just closed is $141,755.16. Deducting for building houses, cost of lots, repairs and furniture (these being considered permanent investments), the running expenses of the schools are $113,660.81 as against $105,485.63 for last year. The increase, $8,175.18, was caused partly by the advancement of

the teachers in their grades of certificates at the annual examination held in July, 1877, which entitled them to higher salaries. It is due mainly, however, to the large addition to the number of different pupils, which is 665 in excess of any previous year. Including the amount disbursed for permanent investments, the average cost of instructing each pupil is $12.45, and without including this amount $9.99. It was on the latter basis that the statistics of former Boards were made up.

The public school system of this county was established by the General Assembly of 1848, and went into full operation on the first of January, 1849. By some persons failure was predicted, and grave objections were raised by others to what was then called an innovation, but by firmness and perseverance all obstacles have been removed and success has crowned the effort. Enemies sometimes get into high places and secretly endeavor to work injury to the schools; but thus far their efforts have proved futile. The strong common sense of the people has been their preservation, and no danger need be anticipated so long as the reins are in their hands.

A comparison by decades may serve to show the progress of the schools from the beginning to the present time.

In 1849 there were sixty schools in operation, and the average number of pupils attending was one thousand eight hundred and fifty-eight. The total amount expended on the system was $22,449 38, making the average cost of each school $337.48, and of each pupil $12.08. The number of teachers employed was sixty, to whom $15,000 was paid for salaries, making an average salary of $250 per annum.

In 1858 there were ninety-five schools in operation, and the average number of pupils was three thousand six hundred and fifty-two. The total amount expended for school purposes was $36,562 55, of which $35,116.76 was for running expenses, making the average cost of each school $369.63, and of each pupil $10 01. The number of teachers employed was one hundred and five, and the amount paid for salaries $28,993.94, making the average salary $276.13.

In 1868 there were one hundred and four schools in opera-

tion, and the average number of pupils attending five thousand three hundred. The total amount disbursed for school purposes was $79,847.74, of which $68,661.13, was for running expenses, which is an average of $661.79 for each school and $12.95 for each pupil. The number of teachers employed was one hundred and forty-two, and the amount of salaries paid $56,110 64, making the average salary $369.14.

In 1878 there were one hundred and fifty-two schools in operation, and the total number of pupils attending school eleven thousand three hundred and eighty, average number seven thousand seven hundred and eighty-four. The total amount disbursed was $141,755.16, of which $28,094.35 was for permanent investments, leaving $113,660.81 for the running expenses, which makes the average cost of each school $747,82, and of each pupil $14 74. To take the number of different pupils as the basis, which seems to be correct, as every child who enters school must be provided for, the average cost is only $9.99. There were two hundred and seven teachers employed, and the amount paid for salaries aggregated $86,178.96, which is an average of $416.80 for each teacher.

From 1868 to 1878 the schools have increased in number 36 per cent; the teachers 45 per cent., and the average number of pupils 47 per cent. The aggregate cost of the system is proportional to its growth, the rate of increase being about the same for each decade in its history. The per capita cost is a little greater, owing mainly to the liberal provision made by the Board for the education of the colored people since 1872, when schools for this race were established by law. The wisdom of a measure which gave to this benighted people the blessings of an education has never been questioned; but to execute it involves additional cost—separate schools must be opened and provided with teachers. At the present time twenty-five colored schools are in operation.

From almost all parts of the county comes the demand for qualified and experienced teachers, and much of the success attending the public schools of the county may be attributed

to this. The status of those having charge of the white schools is shown by the following statement :

Number holding		1st	grade,	1st	class,	certificates	.....	59
"	"	1st	"	2d	"	"	.....	15
"	"	2d	"	1st	"	"	.....	52
"	"	2d	"	2d	"	"	.....	31
"	"	2d	"	3d	"	"	.....	11

The annual examination for teachers is held the first week in July of each year, and continues two days. Applicants for first grade certificates are examined in Orthography, Arithmetic, Geography, Grammar, History, Physiology, Geometry, Algebra, Philosophy and Book-keeping, and are required to make general average of 85 per cent. and not less than 68 in any one branch. For first grade second class an examination in the same branches is required, and a general average of 75 with 60 for the minimum. For second grade, first class, an examination in all the branches, except the three last, and to make a general average of 80 and not less than 64 in any one branch. For second grade, second class, a general average of 65 and 50 for the minimum. It is the intention of the Board to drop third class certificates at the end of the ensuing year, except for colored teachers.

Considerable attention has been given by the teachers to the subject of uniform gradation. The question has been earnestly discussed at the meetings of the County Teachers' Association, eliciting a unanimity of opinion that the efficiency of the schools has been greatly promoted since its adoption. An examination for promotion from grade to grade, conducted by the teachers in all the schools from printed questions prepared by the Examiner, was held on the first of last June and continued two weeks. Tabulated statements of the work were sent to the office, which were generally satisfactory.

THOS. C. BRUFF,
Examiner.

CAROLINE COUNTY.

COL. JAS. E. DOUGLASS, *Pres't.* REV. GEO. F. BEAVEN, *Sec'y.*

Prof. M. A. Newell,

DEAR SIR: In presenting this annual report from our county, I have but few remarks that may be needfully and fittingly made. There is no lack of interest among the masses in the good cause, really encouraging evidence of a prevailing desire for a sound and needful education. Our teachers, in fitness and furnishment for their work, are far ahead of what they were a few years ago.

In the matter of new, good and comfortable school houses we have great cause to be pleased. Forty of our houses are new and commodious; the rest, though old, are good. Three are now under construction, and rapidly approaching completion. The one at Hillsborough, now nearly finished, will furnish the two best school rooms in the county, all that could be desired anywhere in the country. When these are completed, the county will be at no expense for building for years, thus enabling the Board to apply the money saved for running the schools a much longer time.

We regret the County Commissioners failed to grant the requisition made by the County School Board, levying only $5,000 instead of $8,000, as asked for. But the expression of opinion and feeling on this action of the County Commissioners will secure a correction of past error and a more liberal levy in the future.

Our colored schools have made incomparable improvement. They are now nearly all filled by teachers of color, whose scholarship and fitness are refreshing. Truly, a good word can be said for the colored schools.

Respectfully submitted,

GEO. F. BEAVEN.

Secretary.

CARROLL COUNTY.

WILLIAM REESE, *President.* JOSEPH M. NEWSON, *Secretary, &c.*

Professor M. A. Newell,

In submitting the annual report of the Carroll County Public Schools this year, we have little to add to the detailed statement contained in the tables herewith presented.

We must, however, be permitted to reiterate the opinion previously so frequently expressed, that, until better provision shall have been made for creating a sufficient school fund, the remaining school houses needed in various parts of the county cannot soon be provided, nor can the School Board venture to promise to pay adequate salaries to their numerous faithful teachers. No question affecting the successful administration of our admirable public school law in Carroll county gives more anxious concern than that which arises from the study of some method of placing in the school treasury ample means to finish building the necessary houses, and to pay competent teachers fair compensation for their arduous labors in the schools. Until the School Boards shall be thus sufficiently supplied, holding them responsible for an economical administration of whatever funds shall be placed in their hands, we can scarcely hope to be always successful in inviting into the labor of teaching men and women in every way qualified for the work.

Although much remains to be done in building, to supply every location with suitable accommodations to invite children to school and render them comfortable at their studies, yet it is gratifying to be able to say that much in this direction has been done, and, for some time past, well done. Of late years,

all of our new school houses have been built of brick or stone, and care has been taken to have them of sufficient size, of convenient plans, and in pleasant locations.

Westminster, Finksburg, New Windsor, Union Bridge, Middleburg and other villages are all well supplied with comfortable school buildings; a large building, to contain four departments, will soon be completed in Manchester, and throughout the county many attractive school edifices arrest the attention of the passing traveler; but still pressing demands for more houses continue to come from less fortunate locations. The members of the Board are exceedingly anxious to supply all needed requirements, and nothing prevents the speedy accomplishment of the desired object but an inability to procure the necessary funds.

At Manchester, the second village in size in the county, a new school house, to contain four spacious rooms for the accommodation of a *graded* school—one department of which is to be appropriated to the use of a Grammar School—is now being built of brick, on a beautiful site, and when completed it will be an ornament to that place. This is the building for which measures were adopted last year, but which could not then proceed because the necessary funds were not provided, and the building of which now curtails the funds so much that nothing can be added to the very small salaries paid to our teachers. This building is estimated to cost, when finished, about the sum of $4,000. It can scarcely be less, and it may cost a little more.

We would respectfully refer you to what we said last year on the subject of supplying books, stationery, &c., to the schools. Our views on this subject remain unchanged. We regard the provision to supply books, &c., to the public schools to be so defective that, unless the State Board has the power and the disposition to exercise it, giving us a better system of supplying text books, we are of the opinion that the public school system will continue to suffer more from questions of "*book fees*," book changes, the choice and purchase of books, &c., than from any other cause connected with the supplies. Why cannot the books be made free, as

are admissions into school? If the law prevents, why cannot a stable book fee, governed by no sliding scale, by order of the State Board, be required of all pupils who shall not, for cause shown, have been exempted from the payment, or who shall not for themselves have purchased a supply satisfactory to the teacher? We sadly need a better method than we now have of supplying the schools with books, stationery, &c.

While there are a few trustees who are serviceable, and are a considerable help in organizing and sustaining the schools and in caring for the school property, a very large proportion of them pay little regard to their appointments, and, if they do not give notice of their refusal to serve, they neglect to organize; and yet, in this unorganized condition, often each one by himself, they proceed to the discharge of such duties as suit their own individual views, in a loose kind of way, thus, with the best intentions, doing much more mischief than good service; so that often, after having made their trustee appointments and supposed their school machinery to be in good working order, the members of the School Board chiefly concerned have to step in at the last moment and organize the school, with no suitable material at hand.

Of the large old debt against the Board, the reduced sum of $2,688.40, which was reported last year, still remains unpaid; but we have in reserve a remnant of the old county school fund, the chief part of which is stock in the Western Maryland Railroad, and with which, by disposing of it at a sacrifice, this debt can be paid at any time. The balance of this old fund, including the railroad stock, ground rents and balances still due on old judgments, amounts, principal and interest, to a fraction over $8,000; and the Board has forborne to force collections by sale of property, because little would be gained, and much inconvenience would be given to a few worthy people, who, it is believed, will voluntarily liquidate their indebtedness to the Board about as soon as if forced by legal process with costs.

The state of the weather and the condition of the roads for long periods of last winter were not such as to invite children of weak health to attend distant schools, and, therefore, the

tables show a less number of different pupils in school than during the previous year; but those tables will also show a very considerably increased average attendance, which is quite encouraging.

No estimate of the average cost of public school education for each pupil need here be presented. Whoever will refer to the tables, and make a brief calculation, will see that the expense *per capita*, which provides free education to all the children of the county, has been brought down to the lowest minimum; and visitors to the schools expresss the highest admiration of the rapid progress of the pupils, with few exceptions, in all our successfully conducted public schools.

The same causes which reduced the number of different pupils last winter reduced also the number of professional visits paid by the Examiner to only 162 instead of 253 paid the previous year, when the roads presented good sleighing for considerable intervals, whereas last winter afforded little or no use for the sleigh, which is the most convenient mode for traveling country roads.

Notwithstanding the numerous obstacles we have had to encounter, and our shortcomings in various ways, we are encouraged to believe that our public school system is firmly established in the hearts of our people. Our Teachers' County Associations meet with some degree of regularity, and, we think, with considerable benefit to themselves and to the schools; every teacher in service is provided with the *Maryland School Journal;* the County Institute, as you are aware, held a profitable session during the first week in September; and our teachers generally went out to their work on the 9th of September, refreshed, strengthened, and, we hope and believe, considerably improved.

WILLIAM REESE, *President.*

JOSEPH M. NEWSON, *Secretary, &c.*

School Houses Built or Enlarged during the Year.

No new school houses have been built this year by order of the Board, though three are now in course of construction; one of the three is being built by the people of Mount Vernon, at their own expense, having petitioned for a new school district, proposing to convey their house and lot to the Board on certain terms when the latter shall be in a condition to comply with those terms.

The Board, however, has paid the sum of $1,567.30 to enable the contractors to proceed with the building of a large school house in Manchester, and further payments, the total of which amounts to $104.25, in small sums, to pay balances on houses previously built, which, together with $27.33 for out-houses, make up the sum of $1,698.88 which appears for building purposes in the table of disbursements.

CECIL COUNTY.

F. S. EVERIST, *President.* J. SQUIER, *Secretary.*

Prof. M. A. Newell:

In reporting to you the condition of the schools of this county, it is gratifying to be able to say that the schools have been kept open for the four terms, while at the same time we have built three new school houses. The number of pupils in the schools has increased, and also the average attendance, notwithstanding some of the schools have been closed on account of contagious diseases. The character of our schools and teachers, we are happy to say, is still improving; and, while much remains to be done in making the schools what they should be, we can say, with truth, that the community obtains all the worth of the money expended, and we only state what outside parties have said, that both teachers and schools have improved in character and efficiency.

There are many improvements in the efficient working of the school system that we could make if more ample means were placed at our disposal, but we are doing the best we can with the means we have.

It is our opinion that the system, as it now is, is a good one, and, if well administered, will accomplish the work of dispensing the blessing of a good education to all classes. It may not be improper to say here that the alterations foreshadowed at the meeting of the last Legislature are of such a character as to annul much of what has already been done. Our experience tells us that it is difficult to make such changes; they require time and patience, and should only be

made after careful consideration and in compliance with enlightened experience. It is a hazardous experiment to change the whole system of public instruction, involving the expenditure of a million of money on trivial or insufficient grounds, or because some one imagines he has found out an improvement when he has only discovered an alteration.

We close our communication by saying that we believe the present system can be made to produce good schools and to promote the interests of the community and State, and we only ask for it a fair trial and a candid judgment of its merits.

J. SQUIER, *Secretary.*

FREDERICK COUNTY.

JAMES W. PEARRE, *President.* D. T. LAKIN, *Secretary, &c.*

Prof. M. A. Newell,

DEAR SIR: In submitting the annual report of the Board of County School Commissioners of Frederick county for the year ended September 30, 1878, we desire to call your attention to a few facts contained in the accompanying tabulated statement.

It will appear from said statement that, during the past year, eleven new schools have been opened in the county, and fourteen additional names added to our corps of teachers.

It will also be found that the expenditures for public school purposes have been $7,004.76 in excess of the amount disbursed the preceding year. The necessity for additional teachers and schools will be apparent when we notice the further fact disclosed by the aforesaid table, that during the year there was an increase in pupils attending our schools of 610. The foregoing additional expenditure is accounted for in the increased number of teachers and schools, and also in the amounts disbursed for building, repairs and furniture, these items aggregating the large sum of $15,067.21, as follows: For building, $9,884.30; repairs, $1,832.05; furniture, $3,350.86.

At the close of the year there were three new houses in process of building, all of brick—two of them one story high, with two rooms; the other a two-story house, with four rooms. The Board being unable to meet the urgent demands for new school houses in three of the School Districts, the

citizens have erected houses, which are rented by the Board. We confidently believe that, with enough good houses, well furnished, we could put into the public schools of Frederick county at least eleven thousand children.

Under the circumstances now surrounding us, and viewing the matter from the present outlook, the question of running the public schools four terms must be relegated to the indefinite future.

Respectfully,

JAMES W. PEARRE,
President.

D. T. LAKIN, *Secretary, &c.*

GARRETT COUNTY.

WM. A. BRYDON, *President.* E. H. BARTLETT, *Secretary.*

Prof. M. A. Newell,

DEAR SIR: We present herewith the report of the Garrett County School Commissioners for the fiscal year ending Sept. 30, 1878.

Explanatory of the very few official visits made by the Examiner, we can only say the amount of office work required of him just after his appointment, and the schools being open but one term, it was impossible for him to visit any very considerable number of the schools.

E. H. BARTLETT,
Secretary.

* Showing indebtedness of the Board September 30, 1878.

† Showing indebtedness of the Board September 30, 1877.

HARFORD COUNTY.

DR. E. HALL RICHARDSON, *President.* W. H. HARLAN, *Secretary.*

Prof. M. A. Newell,

DEAR SIR: I have the honor to transmit herewith the annual report of the Public Schools of Harford County. The schools were kept open one-half of the summer term, and certificates of indebtedness given for salaries, payable when the county levies in arrears have been paid over to the Board.

The Board is free from debt, and has a small balance upon which to begin the current year.

Several schools were not opened during the summer term, as the pupils could be accommodated in other schools; and some schools have been permanently closed.

The Board is endeavoring to reduce the number of schools as much as possible, believing that the school funds can so be more effectively used.

The Board has this year laid aside a portion of the county tax for building purposes, and has now three houses under contract, which will be completed by November 15.

This report will show that we are advancing in point of numbers and average attendance, and our last Institute, held in September, proved that our corps of teachers is waking up, so that we may confidently expect that the schools of this county will be more thorough and effective during the current year than ever before.

Very respectfully,

W. H. HARLAN, *Secretary.*

HARFORD COUNTY—SUMMARY OF SCHOOL STATISTICS.

For the year ending June 30, 1878.

KENT COUNTY.

SEWELL HEPBRON, *President.* E. F. PERKINS, *Secretary.*

Prof. M. A. Newell,

DEAR SIR: In submitting our annual report, we have no special information to communicate outside of the usual statistics.

A new school house is nearly completed in a new School District, but omitted in this report, as unfinished work.

We are pleased to have further time for developing the School Law unchanged by the last Legislature, and to know that the State Normal School is to go on unimpaired in its capacity for usefulness, and without change of Principal.

SEWELL HEPBRON, *President.*

E. F. PERKINS, *Secretary.*

DR. W. W. DUVALL, *President.* T. S. STONE, *Secretary.*

Prof. M. A. Newell,

DEAR SIR: We respectfully submit the annual report of the Public Schools of Prince George County for the year 1878.

In our last report to the State we were constrained to admit that the condition of our schools for colored children was most unsatisfactory. Since that time special pains have been taken to improve them, and we now report twenty-one schools in successful operation, taught almost exclusively by trained teachers.

Nineteen of these schools are now held in new county houses, furnished with the Soper desk and provided with sufficient blackboards. During the present quarter the two remaining houses will be built and furnished, and now, for the first time since the establishment of the present system, we feel confident that this county's portion of the State's appropriation to colored schools is being efficiently expended, and that our colored population is receiving the full benefit of the State's liberality.

Our white schools also show marked improvement. In filling our schools we have always endeavored to engage the services of trained teachers, and by their aid and co-operation in the Teachers' Association have greatly improved our system of instruction.

Most of the old school buildings have been replaced by new ones. In our last report we advised the erection of eight

new houses: during the past year we have built and furnished one new house, and thoroughly repaired and enlarged two others.

We have also established, during the past year, a second graded school. This school has been successfully built up by Miss E. J. Gillott, a former student of the State Normal School, and has increased its last year's enrollment from 85 to 115 students.

Our financial condition is not entirely satisfactory. Still, we are solvent, our books showing a total indebtedness of $8,286.97, with a cash balance of $2,318.36, while the county owes us $9,464.08.

We have reported in the accompanying table no school house without sufficient blackboards. We mean by this, that we have no school house without at least one board.

Under heading "Colored Schools," we show the amounts of cost of books and receipts from same to be identical. This is true, because we have given no books to indigent children, and require teachers to return all books on hand at the close of the school year.

Very respectfully,

T. S. STONE, *Secretary.*

PRINCE GEORGE CO.—SUMMARY OF SCHOOL STATISTICS.

QUEEN ANNE COUNTY.

DR. JOS. A. HOLTON, *President.* JAS. W. THOMPSON, *Secretary, &c.*

Prof. M. A. Newell,

DEAR SIR: I have very little to say in this statement, without repeating what has been said in former years. The report itself will give you all the information you need as to our condition, which, I am glad to say, is healthy, both financially and otherwise.

We have built during the year three school houses entire, besides finishing another that was in the carpenter's hands when my last report was made; rebuilding a fifth, thus making it as comfortable as a new one; we are making some slight repairs to several others, and have incurred no debts in making these improvements. We have patent desks in almost all the school houses in the county, and shall have them in all, probably, by the close of the present year.

As our school houses have improved, our schools also have improved. They are better in every respect, except in the attendance of the children, and that, you will see, shows a little improvement, and would, I think, show much more if a number of our schools had not have been nearly closed in the Summer Term by the scarlet fever and measles, those scourges of children prevailing in different parts of our county to such an extent that the doors of some of the schools were entirely closed.

As I wish our report, instead of words, to speak for us, I now close it, with the hope that the enemies of our cause will let us work out our own destiny without further trouble or persecution.

Very truly, yours, &c.,

JAMES W. THOMPSON,

Secretary, &c.

QUEEN ANNE COUNTY—SUMMARY OF SCHOOL STATISTICS.

SOMERSET COUNTY.

BERRY T. JONES, *President.* W. E. JONES, *Secretary.*

Prof. M. A. Newell,

DEAR SIR: The annual report of the Public Schools of Somerset County is respectfully submitted: We have but little to submit not contained in the statistical part of the report. By reference to the financial part it will be seen we are slightly in debt. If we could now collect all that is due us, we would have a surplus of nearly $3,000, the greater part of which I think will be collected this winter. The almost entire failure to collect the dredging tax has greatly contributed to our financial embarrassment. Most of our teachers, I am glad to say, are laboring faithfully, and are really doing a good work in the cause of education; but it seems impossible not to have some whose only interest seems to be centered in the fleece and not in the flock.

I was prevented by sickness this year from paying as many visits as I did the year before, but hope now to be able to do more.

Very respectfully, yours,

W. E. JONES, *Secretary.*

SOMERSET COUNTY—SUMMARY OF SCHOOL STATISTICS.

TALBOT COUNTY.

...., *President.* ALEX. CHAPLAIN, *Secretary, &c.*

Prof. M. A. Newell,

Dear Sir: In compliance with the requirements of law I have the honor to submit, herewith, the annual report of the Board of County School Commissioners of Talbot County, for the scholastic year ending July 16th, 1878, and the fiscal year ending September 30th, 1878.

It affords me great gratification to be able to report that we have made an advance along the whole line in our division of the educational forces of the State. The number of pupils enrolled in our schools, during the year, was 208 more than for the year preceding; and this was accomplished without any diminution in the percentage of average attendance. The number of teachers employed by the School Board, during the year, was 71; an increase of three over last year. These teachers performed an immense amount of labor during the ten months of school work. They seemed to take a pride and pleasure in being constantly at their posts of duty, and their teaching was more skillful and effective. The salaries of the teachers were not reduced, and were regularly and promptly paid. At the close of the fiscal year our ledger showed no balances due to any one; we had in bank more than a thousand dollars to our credit, and several thousand dollars due to the School Board remained uncollected.

The whole State seems to have entered upon an era of school house building; and we have not been behind in the work of providing comfortable, attractive, and properly furnished houses for the accommodation of our pupils, as the

accompanying tables will show. There are upon our list four school houses for white children, and four for colored children, which we hope to build next spring and summer. There are upon our list, also, six school houses for white children, and one for colored children, to be enlarged and newly furnished. We may not be able to accomplish all of this work; but the desire and attempt will assist us very much, no doubt, in the undertaking.

We have entered upon another school year with the same corps of teachers, almost entire, filling the same positions. Six teachers resigned, and their places were filled by new teachers. Of this number, one is a graduate of the State Normal School, two are highly educated and have had considerable experience as teachers, and three are from our own schools of the higher grades.

There has been an increase of public confidence in our schools; the teachers have improved in general scholarship, and the examinations of the pupils showed a marked improvement in the quality of their instruction. With these evidences of the growth and progress of the system of public education in our county, we have entered upon a new school year, full of encouragement and promise, with a more hopeful spirit, with renewed energies, and with increased pride in our work.

In conclusion, allow me to return my grateful acknowledgments for your many expressions and acts of encouragement, kindness, and confidence during the year.

Very respectfully, your obedient servant,

ALEXANDER CHAPLAIN,

Secretary, &c.

WASHINGTON COUNTY.

WM. RAGAN, *President.* P. A. WITMER, *Secretary.*

Prof. M. A. Newell,

Dear Sir: We have the honor to submit herewith the annual report of the Board of County School Commissioners of Washington County, for the year ending September 30, 1878.

The financial statistics show an increase of expenditure over the previous year for Teachers' salaries, books for indigent pupils and furniture.

We have erected seven new houses since the date of our last report, and the outlay necessary to provide furniture for these houses, for the academy building and for six new houses erected last year, has swelled the expenditures for the item of furniture to an unusual amount. The increase of expenditure for salaries is due to an increased number of teachers employed.

We have nothing special to report in school work. The statistics show a small increase in both the general and average attendance. We have opened three additional graded schools for the current year, and employed a number of additional teachers.

The High School opened last year with Prof. R. S. Henry as principal, has given general satisfaction.

This school was kept open ten months, at a cost to the County of about $700; very little more than our Grammar Schools cost for a term of seven and a half months.

The County levy for the public schools for the current year is $38,000, or about twenty-two mills on the dollar.

Respectfully submitted,

WM. RAGAN, *President.*

P. A. Witmer, *Secretary.*

WICOMICO COUNTY.

F. C. TODD, *President.* GEO. W. M. COOPER, *Secretary.*

Prof. M. A. Newell,

DEAR SIR: I have the honor to transmit to you, herewith, the report of the Board of School Commissioners for Wicomico County, for the last school and fiscal years.

You will observe that the figures show a satisfactory increase in the number of different pupils on roll and in the average attendance; the only figures that look at all discreditable, are those indicating the number of visits paid by the Examiner to the schools, and, although these are a source of deep mortification to him, they could not have been easily avoided. Ill health, which continued through the whole year, unfitted him for riding, and left him scarcely able to perform the work of the office. It is to be hoped, however, that none of the teachers lost any of their zeal in consequence, and that the efficiency of the schools was in no wise impaired thereby. His health has since improved, and he hopes to be able to discharge his whole duty in the premises during the present year.

While it is gratifying to know that the action of the School Boards in their efforts to recover the school funds, which had been diverted from their purpose, was sustained by the Court, to which the matter was taken for adjudication, it is unfortunate for the schools that the Legislature decided to ratify the acts of the late Comptroller, and thus perpetually deprive them of money actually levied and collected for their use, and which they are justly entitled to receive. That economy

that permits them to suffer from the errors or mistakes of a disbursing officer can only be characterized as unwise and misdirected.

One of the strongest evidences of the popularity of our public school system is to be found in the fact that it withstood the assaults of its enemies in the last Legislature. These, at first, were apparently numerous, and, in the spirit of real iconoclasts, seemed determined to lay violent hands upon it and either change or destroy it altogether. But its friends could not witness with indifference the destruction of the fruits of ten years' experience, nor could the masses of the people see, without deep solicitude, efforts put forth to overthrow a system fraught with so much of hope and promise to them. Its opponents took warning, and finally desisted from their assaults through fear, no doubt, of the popular voice, and the danger of being remanded to private life. It is a subject of congratulation to all its friends, that every feature of the old law was left intact, and they should take courage for renewed efforts to bring it to the highest state of perfection of which it is susceptible.

For the Board,

GEO. W. M. COOPER, *Secretary.*

WORCESTER COUNTY.

DR. JOHN P. R. GILLIS, *President.* GEO. M. UPSHUR, *Secretary.*

Prof. M. A. Newell,

DEAR SIR: In submitting my annual report for the year ending September 30th, 1878, I have but few remarks to make. The report will speak for itself. It will show, I think, that the schools have in no respect fallen below their past degree of efficiency, but have, on the other hand, made decided progress. In the number and condition of school houses, the number and efficiency of teachers, the enrollment and average attendance of pupils, the public school system attained a higher degree of excellence during the year just ended than ever before in the history of this county. Never in any one year before have so many children in this County attended school; never have the blessings of education been so generally diffused among all classes of people. The rich and poor, white and colored, have alike been the recipients of the bountiful dispensation of mental food showered by our noble State upon her youth. During the winter and spring, especially, the capacity of our school houses and the energy of our teachers were taxed to their utmost extent. Not a murmur of complaint, nor the slightest expression of dissatisfaction as to the administration of the Public School System in State or county, has reached the ears of the school authorities. Our public schools are evidently therefore growing in public favor.

Our three High Schools, located respectively in Berlin, Snow Hill and Pocomoke City, are now in excellent condition. I think they would compare favorably with any High

School in the State. In any one of them, a pupil can receive a thorough education, beginning with the alphabet and ending with the classics and higher mathematics.

I cannot refrain from commending also the manner in which our colored schools have been conducted. The nineteen schools of this character now in our county are, with a few exceptions, well managed and well taught by their colored teachers. In some places we have been compelled to use the churches of the colored people for school houses, yet the houses, whether churches or school houses proper, all are comfortable and well provided with furniture. I greatly fear, however, that the money appropriated for our colored schools will not be enough to enable us to maintain as many of such schools in the future as we would desire.

Very respectfully,

GEO. M. UPSHUR, *Secretary.*
